PROFILE

Lead Full Stack Developer with 6+ years in web development, focused on React frontends. Experience includes Know Your Customer (KYC) onboarding, Spring Boot applications and remote part-time delivery.

EXPERIENCE

Lead Full Stack Developer

Mar 2025 - Present

Citi

- Built a **sanctions questionnaire query engine**, released in 2025, that returns matching results by applying comparison operators and values to questions stored in a database.
- Implement business analyst requirements with React and Spring Boot, track Scrum work in Jira, and prepare changes for tester handoff and production release.
- Developing a **research review application** for KYC analysts to review extracted document information before requesting additional client details.
- Developed minimum viable products (MVPs) and demo UI screens across multiple KYC projects.
- Contributed to a **winning Citi hackathon team** developing a tool designed to identify AI-generated content in PDFs and images.

Senior Software Developer

Oct 2023 - Mar 2025

The Refugee Centre | Remote, part-time

- Developed a **chatbot interface** using TypeScript, React and Bootstrap.
- Developed FastAPI backend services with SQLAlchemy, PostgreSQL and Alembic.

Software Engineer

Oct 2021 - Oct 2023

Royal Bank of Canada

- Led development of a React and Node.js performance testing app integrating qTest and JMeter.
- Maintained an internal testing application built with Node.js, Angular and MongoDB.
- Led migration of the Helios CI/CD tool to OpenShift and resolved infrastructure issues.

Full Stack Developer | Beyond Media

Jan 2021 - Oct 2021

- Developed campus virtual tour and content management features using React and Wagtail.

Web Developer | FedEx

Jan 2020 - Dec 2020

- Enhanced FedEx Delivery Manager with Java, Spring Boot and Angular; supported Jenkins deployments.

Teaching Assistant | York University

Sep 2019 - Apr 2023

- Led web and mobile development tutorials, providing technical guidance and feedback to students.
